

Lien Solutions

End-to-End Portfolio Management. The Relief You've Been Looking For.

Managing and tracking your loan portfolio can be time-consuming for your team on a typical day, much less when volumes spike. Add to that the pressures of tighter deadlines, increased audits, and ever-changing county rules, and your team can become overstretched and your process prone to errors and rejections.

Wolters Kluwer's Lien Solutions can help transform how you manage your mortgage related documents to increase team efficiency, balance workloads, cut rejections, shorten turn times, and reduce your risk.

From Painful to Productive

Our customers told us what wasn't working with their mortgage document process. We designed iLienRED® to address their issues:

- **Loan System Integration with iLienRED:** Utilize a full integration or upload a spreadsheet to reduce rekeying
- **eRecording:** Record in hours or days vs. weeks or months, in more than 1,500 jurisdictions; county fees are always advanced for you whether recording a paper document or choosing the electronic route.
- **eSignature and eNotarization:** Fast, paper-free, and it simplifies audits
- **Activity Log:** Captures important actions on both sides
- **Customizable Template Options:** Based on up-to-date county rules and templates
- **County Requirement Prompts:** Reduces errors for incomplete data; current in all 3,600+ jurisdictions
- **Custom Reporting:** Choose from virtually any column, any data, any filter, and any sort
- **Compliance Support:** A real-time quick view to handle urgent orders first; recorded and rejected images always available in portfolio
- **Rejections:** Workflow and reporting to easily manage rejected documents

What We Offer
